About the Role

We are looking for a motivated and curious **Full Stack Developer** with 1–3 years of hands-on experience to join our engineering team. The ideal candidate should have a solid understanding of backend development using **Node.js**, and a good grasp of **frontend technologies (HTML, CSS, JavaScript)**—especially for debugging, optimization, and small UI fixes.

You'll be working closely with our product and backend teams to deliver performant, maintainable, and scalable web applications.

Key Responsibilities

- Develop, maintain, and optimize backend services using **Node.js** and frameworks like **Express.js** or **NestJS**.
- Debug, fix, and improve existing frontend features written in **HTML, CSS, and JavaScript**.
- Collaborate with UI/UX designers to ensure seamless integration between backend and frontend components.
- Write clean, maintainable, and well-documented code following best practices.
- Troubleshoot production issues and contribute to improving application performance and reliability.
- Implement and maintain APIs for third-party services, including ongoing updates and troubleshooting.
- Understand API specification of Gateways and Banks and close on any clarifications working with Product Manager and Banking solutions.

Required Skills & Qualifications

- **1–3 years** of professional experience as a Full Stack or Backend Developer.
- Proficiency in **Node.js**, **Express.js**, and RESTful API development.
- Solid understanding of **JavaScript**, **HTML5**, and **CSS3** for debugging and UI troubleshooting.
- Basic knowledge of databases such as **MongoDB**, **MySQL**, or **PostgreSQL**.
- Strong debugging and problem-solving skills.
- Ability to work collaboratively in a fast-paced environment.

Nice to Have

- Experience with frontend frameworks like **React**, **Vue**, or **Angular**.
- Exposure to **TypeScript** or **Next.js**.

- Comfortable working with AI to increase productivity.
- Understanding of **CI/CD pipelines** and **cloud deployment** (AWS, GCP, or similar).
